

# REGÉLŐ FEHÉR TÁLTOS ΛΟΓΙΑΙ ΗΧΟΙΣΘ ΔΑΔΑΝΗ

In January, 2007 we were formed as the Drummers of the 'Regélő Fehér Táltos' an Association for the Preservation of Tradition in Hungary, which had 27 members. In 2010 we became a public benefit organization. The founder and leader of our group is Tibor Putnoki whose life was changed by a 9 minute clinical death experience in 1994 about which he has already given nearly 800 talks around the world.

Our aim is to evoke; reveal the features/inner values of the ancient Hungarian folk spirit and to live these through our personal lives, and further, to show these to the widest reaches of Hungarians and to all nations of the world which are opened to this. Our association is independent of any political or religious affiliation. Our group performs at all events and programs both at home and abroad where we have the possibility to address people through our songs. We support all events where Hungarians help Hungarians, where humans help humans, where eternal human values and the importance of togetherness appear.

All that we want to say focuses on the importance of love, kindness and honour, respect for the ancestors, patriotism, and the belief in our common source. This is amplified by the healing inspiring vibration of our drums and our traditional costumes.

Since 2008 we are present at every major event in Hungary that preserves traditional values, be it a Kurultaj, Day of the Ancestors, National Assembly of Hungarians, Festival of the Ages etc.

Since 2009 we have organized, each summer a drummer's camp for children and youngsters that includes teaching ancient Hungarian history and runic writing.

Among our members there are older people as well as very young ones, our community is like a big family. In our ordinary lives we work in very different fields, however even there, we do pay attention to the spirituality that we represent on stage.

The activity of our group is voluntary, but what we receive from our audiences, the love and gratitude is for us invaluable. We especially feel it in connection with our performances abroad where, for our brothers and sisters living beyond the borders of Hungary, how much it means and what they receive as spiritual support and reinforcement from us becomes almost tangible.

Tears in the eyes, a tight hug tells us all, without words. It is a pleasure for us to be able to help our audiences to live as Hungarians wherever their home is, or where destiny has called them.

During the past eight years we have had almost a thousand performances in our small country, and we also have been on stage in several places close to Hungary: Transylvania (Romania), 'Kárpátalja' (Ukraine), 'Felvidék' (Slovakia), and in 'Délvidék' (Serbia) but also further afield, with a series of performances in Wales (UK) in 2009. Our living and expanding relations with the tradition keepers and representatives of other nations (for instance Turkish, Kazakh, etc.) prove that what we want to say reaches people's hearts beyond any linguistic, ethnic, religious or cultural differences.

In 2014 the 'Regélő Fehér Táltos' Fan Club was established where we are waiting for those who would like to get closer to us or who would like to help our group through their voluntary work. We welcome everyone at our performances! Let us travel together with the sounds of the drums, revive the splendor of bygone times and through this let us build happiness for our common future!
